HAVE FUN FIGHTING DANGEROUS DECIBELS

FREE WORKSHOP FOR EDUCATORS

Topic: Prevention of Noise-induced Hearing Loss and Tinnitus

Thursday, February 24, 2005

4:30pm - 6:30pm

Doubletree Hotel at Reid Park, 445 South Alvernon Way City, Tucson, AZ

K-12 classroom educators are invited to attend a free, two-hour workshop on prevention of noise-induced hearing loss and related tinnitus. This fun, hands-on workshop will include information on...

1. the physics of sound
2. ways to prevent noise-induced hearing loss and tinnitus
3. hands-on activities
4. resources for information beyond and in support of the workshop

Participants will be introduced to creative activities for the classroom using just a few easy and inexpensive props. The activities are designed for students in elementary and middle school but they also work well for older students, and adults too. Supplies will be provided.

Please tear off, complete, and send the registration form below to Linda Howarth, Oregon Health & Science University, NRC-04, 3181 SW Sam Jackson Park Road, Portland, OR 97239, or fax it to 503-494-5656. You can also type your information into this PDF form, print the form out (please note that you **won't** be able to save changes to this pdf), and fax it to Linda Howarth at 503-494-5656.

 Yes, I would like to participate in this free workshop.

This FREE workshop is presented as an extension of the National Hearing Conservation Association conference taking place February 24-26, 2005 at the Doubletree Hotel at Reid Park in Tucson. For additional information about the conference go to www.hearingconservation.org

Dangerous Decibels™ is a Portland based, public health partnership for prevention of noise-induced hearing loss and related tinnitus. Program partners are Oregon Hearing Research Center at Oregon Health & Science University, Oregon Museum of Science and Industry, and Portland State University. To find out more about the Dangerous Decibels™ program go to www.dangerousdecibels.org

Did You Know?

"...over the last 10 years, the percentage of 2nd graders with hearing loss has increased 2.8 times; hearing loss in 8th graders has increased over 4 times."
Montgomery and Fujukawa 1992

5.2 million 6-19 year olds have hearing loss directly related to noise exposure.
3rd National Health and Nutrition Examination Survey, Niskar et al. 2000
